

MILES OF Smiles

Mobile Dental Clinic

*Serving the under-served
of our Southern Indiana
residents by bringing no cost
dental care conveniently to
their communities.*

OUR MISSION

To put smiles on the less-fortunate in our community.

- We are working with local dentists who will volunteer their professional services.
- We are working with financial partners of all levels of sponsorship to cover the cost to run the mobile unit.

This will enable the Mobile Dental Clinic to provide FREE, easily accessible dental care for low-income individuals in Southern Indiana. By serving where they live, the mobile clinic eliminates the obstacles that prevent many community members from getting proper and, often times, emergency dental care. We want to bring smiles to those in our community who have the need.

Your help and partnership is essential to the success of our mission to serve the community.

SERVICES OFFERED

- Oral Examinations
- Digital X-Rays
- Extractions
- Fillings
- Oral Hygiene Education

Battling the barriers of insurance situations, financial shortcomings, and transportation issues, low-income and non-working residents find it difficult to take care of basic dental necessities.

Approximately 10.3%* of Southern Indiana residents live below the poverty line and often don't have the means or even the access to dental care. A hygienic mouth and clean teeth are often major roadblocks on an impoverished person's journey to a healthy lifestyle and even a job. *US Bureau of Economics; stats.indiana.edu
